INFOLOCK

Upgrade
Package Overview

Package Description

Infolock evaluates an organization's data security environment by conducting a thorough review of existing policies, product adoption, and system health.

This service provides organizations with clear insights in their product utilization and maturity and best practice recommendations tailored to their business-defined data requirements. The Upgrade Package also ensures that products are upgraded to the latest version, aligning security measures with business needs.

↑ Product upgraded to current version

About Infolock

Founded in 2005, Infolock is the go-to data risk management advisory, consulting, and managed services firm for security conscious organizations. With a programmatic approach, Infolock expertly manages the complex data risks of its clients, enabling organizations to achieve their strategic business objectives. Named among the "Fastest Growing Companies" on Inc. Magazine's "Inc. 5000" list, Infolock developed DataRAMP™, a data risk management framework which empowers organizations to understand and manage data risk in the same manner as other organizational risks, such as financial, competitive, and regulatory risk. Headquartered in Arlington, VA, Infolock serves customers in the financial services, healthcare, government, educational and other highly-regulated industries around the world.
